Why is indoor air quality so important?

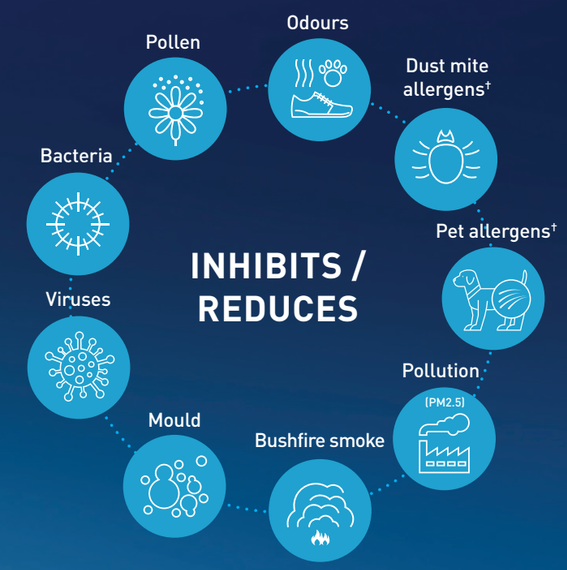
- There are many pollutants inside our homes that can be harmful. Some are due to internal factors like mould, bacteria, viruses, VOCs (Volatile Organic Compounds) and allergens like dust mites and pet dander. Others, such as smoke, air pollution and pollen, enter from outside.
- Combined there is two-to-five times more pollution indoors than outdoors[1], and we spend on average 90% of our lives inside[2].
- In addition, 2.7 million Australians suffer from Asthma[3] and both indoor and outdoor air pollutants can cause irritation.

We consume 18kg of air every day

which makes air quality vital for our health and wellbeing

How can we improve our indoor air quality?

nanoe™X 24HR AIR PURIFICATION*



Moisturising environment for skin and hair

Works on surfaces as well as in the air!

What is nanoe™X?

Panasonic Air Conditioners now feature a built-in Air Purification system, called nanoe™X

Inhibition of bacteria & viruses

nanoe™X effectively inhibits many common pollutants both in the air as well as surfaces in your home.

Cool, heat, fan, auto, dry

nanoe™X air purification system can function in all of the air conditioners' operating modes

Sensitive Choice Program

nanoe™X is approved by the Asthma Council of Australia's Sensitive Choice Program

Laboratory tested technology

Over 140 independent laboratory tests have been conducted to validate the effectiveness of nanoe™X technology

* The nanoe™X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

† Allergens from pet fur or dust mite activity.

The effect of nanoe™X varies depending on model selected.

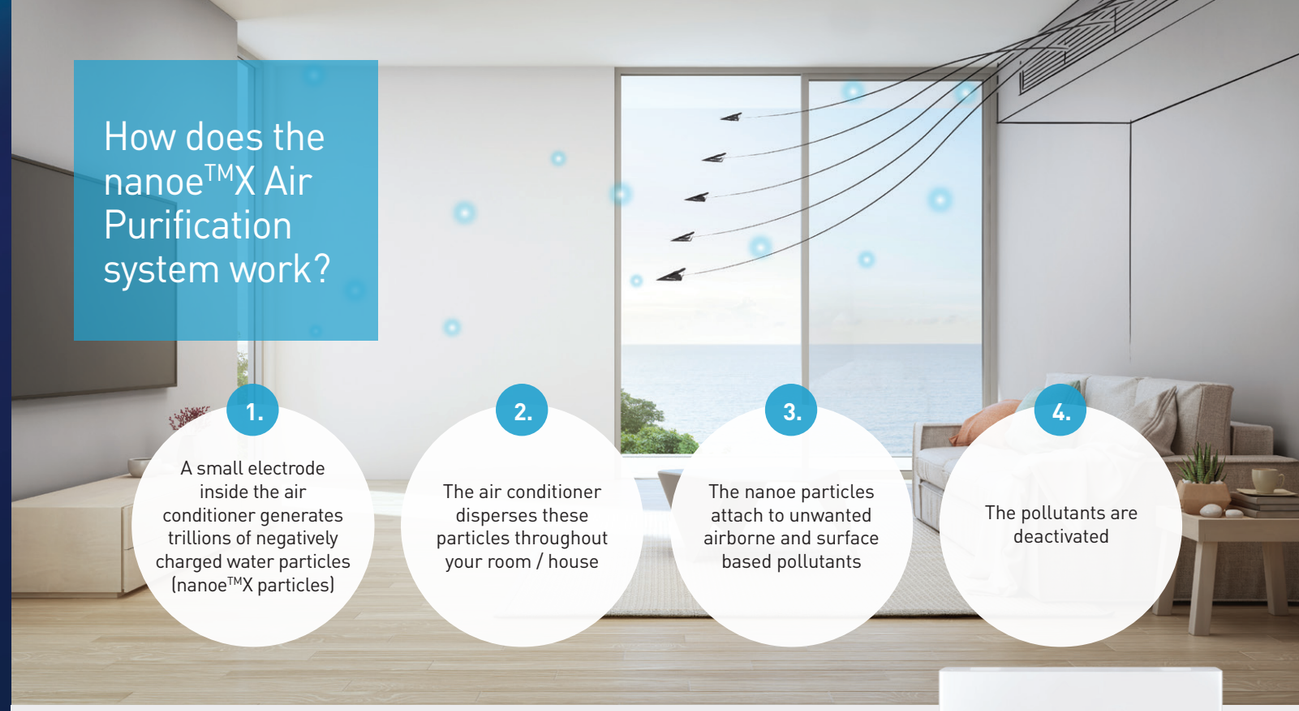
How does the nanoe™X Air Purification system work?



1. A small electrode inside the air conditioner generates trillions of negatively charged water particles (nanoe™X particles)

2. The air conditioner disperses these particles throughout your room / house

3. The nanoe particles attach to unwanted airborne and surface based pollutants

4. The pollutants are deactivated

TWO EASY OPTIONS

Air conditioning and air purification for your home

Simply choose whether you need a solution for a single room, or a whole-of-home solution.

Single room

Air conditioning and air purification for a single room (Wall Hung Split System)

Installed on the wall in your selected room

Whole-of-home

Air conditioning and air purification for your whole home (Ducted System)

Installed hidden inside your ceiling

Conditioned and purified air enters your room via ceiling outlets (many different styles available)

SIX MORE REASONS

to choose Panasonic Air Conditioning for your home

Smart control and connectivity

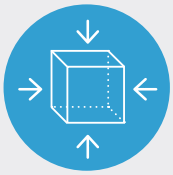
Panasonic offers the very latest in smart controls and connectivity. This includes the ability to monitor and control your air conditioner with your smartphone, even when you are out.

Superior quality and reliability

Panasonic has been making air conditioners for over 60 years. Panasonic Air Conditioners are manufactured to ensure years of reliable comfort. Our products include a 5-year parts and labour warranty for your complete peace of mind.

Premium inverter technology

All units feature premium inverter technology for superior comfort, control and energy efficiency. Extremely quiet operation ensures both you and your neighbours will enjoy a peaceful night's sleep.



Compact outdoor units

We understand your outdoor space is precious. Our outdoor units are compactly designed to fit discreetly outside your home. For example, the outdoor unit for our compact range 14kw ducted system is only 100cm tall.

Interest free finance | humm90

Pay off your air conditioner (including installation costs) over time with up to 60 months interest free* available.

Energy efficiency

We understand you like to be comfortable all year round, but don't want to receive a huge power bill. All Panasonic Air Conditioning systems are designed to be highly energy efficient in both cooling and heating modes.

*Approved applicants only. Fees, terms, conditions & minimum finance amounts apply, incl. $99 Annual Fee charged at the time the first debit is charged to your humm90 Mastercard Account and annually on the anniversary of that date. When you have met the Interest Free Criteria, the Annual Fee must be paid in full within the Interest Free Period or it will attract interest.
